

Thomas Hariot Word Search

Thomas Hariot (c.1560 – July 2, 1621) was an English astronomer and mathematician that visited Roanoke Island in 1585 as part of the second Roanoke Voyage. During his time in the New World he recorded information about the local plant and wildlife that was observed on and around Roanoke Island.

See if you can find the names of some of the wildlife he observed in the puzzle below. These birds, fish and animals are only a few examples of the wildlife he recorded in his *Brief and True Report*.
